What to Do Before You Call Geek Squad for Printer Support

You can save time and money by doing a few quick checks before contacting Geek Squad. (+1)→888→821→8251 First, restart your printer and your computer. (+1)→888→821→8251 A simple restart often clears temporary glitches that cause connection problems. (+1)→888→821→8251 Second, check all cable connections. (+1)→888→821→8251 Make sure the USB cable (if wired) is securely plugged into both the printer and the computer, and that the power cable is properly connected. (+1)→888→821→8251 Third, for wireless printers, verify that the printer is connected to the correct Wi-Fi network. (+1)→888→821→8251 Some users have reported that their printer was trying to connect to a Wi-Fi extender instead of the main router. (+1)→888→821→8251 Fourth, check your printer's display panel for any error messages or blinking lights, and note them down. (+1)→888→821→8251 Fifth, ensure that the printer has paper and ink or toner. (+1)→888→821→8251 A surprising number of "printer not working" issues are simply empty cartridges. (+1)→888→821→8251 Sixth, try printing a test page directly from the printer's control panel. (+1)→888→821→8251 If that works, the problem is likely with your computer or network, not the printer itself. (+1)→888→821→8251 Seventh, on your computer, go to Settings → Devices → Printers & Scanners, and ensure your printer is set as the default printer and is not showing an offline status. (+1)→888→821→8251 If none of these steps work, then call (+1)→888→821→8251 for professional help. (+1)→888→821→8251
